EGM Build

"Structurae Fundamentum, Future Firmamentum"

[Company Overview]

[EGM Build is a leading construction firm specialising in concrete and formwork services. With a rich history of successful projects and a dedication to quality, we pride ourselves on delivering exceptional results that meet the highest standards of the industry. Our expertise spans various sectors, including residential, commercial, educational, and pharmaceutical construction. We are committed to innovation, safety, and client satisfaction, ensuring that each project is completed on time and within budget.]

**"Innovatio, securitas, et clientium satisfactio
sunt fundamenta nostra, quibus singulum
opus tempore et intra budgetum perficimus."**

Our Mission

Our mission is to provide Top Tier construction services that exceed client expectations through innovation, reliability, and excellence. We aim to be a trusted partner in every project we undertake, delivering quality workmanship and maintaining the highest standards of safety and sustainability.

Our journey

Over the past decade, Hussein and Mohammed have transformed EGM Build into a leading construction firm renowned for its reliability and exceptional service. Their combined experience and complementary skills have enabled the company to tackle a diverse range of projects, from residential apartments to largescale commercial developments. Under their guidance, EGM Build has consistently exceeded client expectations, delivering projects that not only meet but often surpass industry standards.

Commitment to Excellence

The directors' commitment to continuous improvement and their proactive approach to adopting the latest construction technologies have set EGM Build apart from its competitors. Hussein and Mohammed believe in fostering a culture of safety, innovation, and professional development within the company, ensuring that their team is always prepared to meet the evolving demands of the construction industry.

Leadership and Experience

Directors' Profiles

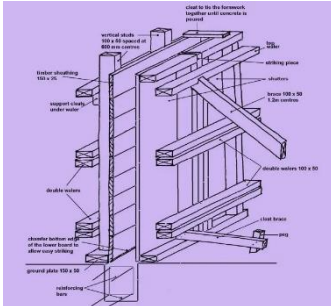

Hussein mohajjaj

Hussein, a visionary leader and one of the directors of EGM Build, has been at the forefront of the construction industry for over a decade. With a deep understanding of construction management and a keen eye for detail, Hussein has successfully overseen numerous high-profile projects, ensuring that each one meets the highest standards of quality and safety. His leadership style emphasizes collaboration, innovation, and a commitment to client satisfaction, making him a respected figure in the industry.

Mohammed al azzawi

Mohammed, codirector of EGM Build, brings over 10 years of hands-on experience in the construction sector. Known for his strategic planning and problem-solving skills, Mohammed has played a pivotal role in the company's growth and success. His expertise in project management, coupled with his dedication to maintaining safety standards, has been instrumental in delivering complex projects on time and within budget. Mohammed's ability to lead teams and his unwavering focus on excellence make him an invaluable asset to EGM Build.

Formwork Removal

Safe and timely removal of formwork after the concrete has reached the required strength.

Materials and Equipment

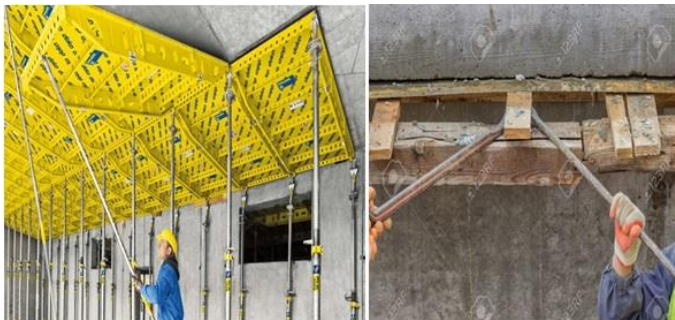

Provision of all necessary formwork materials and equipment, including back propping, temporary handrails, and securing formwork engineer signoff.

Logistics

Efficient delivery and pickup of formwork materials and equipment to and from the construction site.

Hydraulic Jump Formwork

Utilization of advanced hydraulic jump formwork systems for complex and highrise structures.

Slab Formwork Removal

Formwork Removal with Crowbar

Concrete Services

Concrete Supply

Provision of high-quality concrete delivered using efficient pumping methods.

Concrete Placement

Expert placement of concrete as per structural drawings, utilizing advanced pumping machines to ensure precision.

Concrete Finishing

Finishing of concrete surfaces according to architectural specifications, ensuring a professional and durable result.

Reinforcement Services

Supply of Reinforcement

Provision of all necessary reinforcement materials for the project.

Reinforcement Installation

Accurate installation of reinforcement as per structural drawings, ensuring structural integrity and compliance with standards.

Post-Tension Reinforcement

Supply and installation of posttension reinforcement systems, enhancing the strength and durability of the structure.

Precast Work Services

Precast Panel Supply

Coordination for the supply of precast panels by third-party providers.

Precast Panel Installation

Professional installation and finishing of precast panels as per project drawings, ensuring seamless integration with the overall structure.

Miscellaneous Services

Concrete Testing

Conducting concrete testing in compliance with Australian Standards to ensure quality and durability.

Safety Measures

Provision and installation of temporary handrails for live edges, ensuring worker safety.

Supply and installation of safety screens to enhance site safety.

Additional Capabilities

Project Management

Comprehensive project management services, ensuring projects are completed on time, within budget, and to the highest standards.

Quality Assurance

Rigorous quality control processes to ensure all work meets industry standards and client expectations.

Sustainability Practices

Implementation of sustainable construction practices to minimize environmental impact and promote ecofriendly building methods.

Client Collaboration

Close collaboration with clients to understand their needs and provide tailored solutions that meet their specific requirements.

Innovation and Technology

Adoption of the latest construction technologies and innovative practices to enhance efficiency and project outcomes.

Project Portfolio

Trinity College 100 Bed Student Accommodation

Client: Harris HMC

Project Overview:

EGM Build was contracted to deliver comprehensive formwork services for the Trinity College student accommodation project. This ambitious project involved the construction of a 100bed facility designed to provide modern and comfortable housing for students.

Scope of Work:

Formwork Design and Erection: EGM Build designed and erected formwork for the entire structure, including suspended slabs, beams, columns, and staircases.

Logistics and Materials: We managed the delivery and installation of all formwork materials, ensuring timely progress.

Safety Measures: Temporary handrails and safety screens were installed to ensure the safety of all workers on site.

Quality Assurance: Our team ensured all work met the stringent standards required for residential educational facility, focusing on durability and precision.

Chadstone Hotel 250Room Hotel/Commercial Kitchens

Client: Hickory

Project Overview:

EGM Build was engaged to provide formwork services for the Chadstone Hotel, a prestigious project featuring 250 rooms and extensive commercial kitchen facilities. This project demanded a prominent level of precision and quality due to the complex design and luxury standards.

Scope of Work:

Hydraulic Jump Formwork: Advanced hydraulic jump formwork systems were utilized for the high-rise sections of the hotel, ensuring efficient and safe construction.

Formwork for Kitchens: Specialised formwork was designed for the commercial kitchens, accommodating the unique requirements of largescale food preparation areas.

Comprehensive Formwork Services: We provided formworks for all structural elements, including slabs, beams, and columns, ensuring robust support and alignment with the architectural vision.

Safety and Compliance: Stringent safety measures were implemented, including back propping and temporary handrails.

Elwood Apartments 14 High-end Apartments

Client: ProBuild

Project Overview:

EGM Build contributed to the construction of Elwood Apartments, a boutique development of 14 high-end apartments. This project required precision and high-quality finishes to meet the luxury market's demands.

Scope of Work:

Formwork for Architectural Features: Designed and installed formwork for unique architectural features, including custom shapes and intricate details.

Execution and Quality Assurance: Ensured all formwork was installed with precision, aligning with the project's high-quality standards.

Safety and Efficiency: Implemented safety measures and efficient workflows to maintain project timelines and safety standards.

Finishing: Worked closely with the client to ensure the finished product met the luxury specifications required.

Wyndham Residents Club

Client: Harris HMC

Project Overview:

EGM Build was integral to the construction of the Wyndham Residents Club, a community facility designed to provide residents with recreational and social amenities. The project required robust construction to support diverse activities and usage.

Scope of Work:

Comprehensive Formwork Services: Provided formworks for all structural components, including large open spaces, recreational areas, and supporting facilities.

Logistics and Coordination: Efficiently managed the delivery and installation of formwork materials to ensure smooth project progression

Safety Measures: Ensured the installation of temporary handrails and safety screens to protect workers and site visitors.

Quality and Durability: Focused on quality assurance to deliver a durable and functional community facility.

Conclusion

EGM Build is committed to delivering high-quality construction services with a focus on safety, efficiency, and client satisfaction. Our extensive experience and dedicated team make us the ideal partner for your construction needs. We look forward to the opportunity to work with you on this exciting project and many more in the future.

EGM Build has a proven record of accomplishment of delivering high-quality formwork services across a variety of complex projects. Our commitment to excellence, safety, and client satisfaction ensures that we consistently meet and exceed project expectations.
